SOCF-03-11

Python 3Free

Upgrade your instance

Service ID: srv-d4bk3949c44c73ds51d0

lilidgt / SOCF-03-11main

https://socf-03-11-7z9d.onrender.com

Connect

Manual Deploy

Settings

General

Name

SOCF-03-11

A unique name for your Web Service.

Edit

Region

Oregon (US West)

Your services in the same region can communicate over a private network.

Instance Type

Free0.1 CPU512 MB

Update

Please enter your payment information to select an instance type with higher limits.

See remaining free usage, or learn about free service limits.

Build & Deploy

Repository

https://github.com/lilidgt/SOCF-03-11

The repository used for your Web Service.

Edit

Branch

main

The Git branch to build and deploy.

Edit

Git Credentials

lilideguti@gmail.com (you)

User providing the credentials to pull the repository.

Use My Credentials

Root Directory

Optional

If set, Render runs commands from this directory instead of the repository root. Additionally, code changes outside of this directory do not trigger an auto-deploy. Most commonly used with a monorepo.

Edit

Build Filters

Include or ignore specific paths in your repo when determining whether to trigger an auto-deploy. Paths are relative to your repo's root directory. Learn more.

Included Paths

Changes that match these paths will trigger a new build.

+ Add Included Path

Ignored Paths

Changes that match these paths will not trigger a new build.

+ Add Ignored Path

Build Command

Render runs this command to build your app before each deploy.

\$ pip install -r requirements.txt

Edit

Pre-Deploy Command

Optional

Render runs this command before the start command. Useful for database migrations and static asset uploads.

\$

Edit

Start Command

Render runs this command to start your app with each deploy.

\$ gunicorn app:APP

Edit

Auto-Deploy

By default, Render automatically deploys your service whenever you update its code or configuration. Disable to handle deploys manually. Learn more.

On Commit

Edit

Deploy Hook

Your private URL to trigger a deploy for this server. Remember to keep this a secret.

Regenerate hook

Custom Domains

You can point custom domains you own to this service. See DNS configuration instructions.

+ Add Custom Domain

Render Subdomain

Enabled

If enabled, your service remains reachable at its onrender.com subdomain in addition to all custom domains. Disable to serve exclusively from custom domains.

Your service is reachable at https://socf-03-11-7z9d.onrender.com.

PR Previews

Pull Request Previews

Spin up temporary instances to test pull requests opened against the main branch of lilidgt/SOCF-03-11. Choose Automatic to preview all PRs, or Manual for only PRs with [render preview] in their title. Pull Request Previews create a new instance for just this service. Use Preview Environments to clone a group of services for every PR.

Off

Edit

Edge Caching

Serve static content at the edge to improve performance and reduce service load. Learn more.

Cacheable File Types

Specify which file types Render is allowed to cache for your service. You can fine-tune this behavior with Cache-Control headers.

None

Edit

PAID

Edge Caching is only available for paid instances.

Upgrade

Notifications

Service Notifications

Set notifications to receive for your service. This setting will override your workspace's default settings.

Use workspace default (Only failure notifications)

Edit

Preview Environment Notifications

Configure notifications for preview environments and service previews.

Use account default (Disabled)

Edit

Health Checks

Health Check Path

Provide an HTTP endpoint path that Render messages periodically to monitor your service. Learn More.

/healthz

Edit

Maintenance Mode

Maintenance Mode

Temporarily disable public access to your service. While enabled, Render serves a static maintenance page for all incoming requests. Learn more.

Maintenance Mode Disabled

Custom Maintenance Page

Optional

If provided, Render uses the specified URL for your maintenance page instead of serving the default page.

PAID

Maintenance mode is only available for paid instances.
